Light Bulb Puller

Application number 10/638,203

Claims

1 .We claim this special design of a tool to remove small pressure fitted light bulbs from their base.

It is uniquely shaped to fit easily into one's hand and allows for easy removing and changing of pressure fitted bulbs.

It has a notch that fits between the plastic shoulder of the bulb and the top of the base.

2. That its shape, small form, and ease of use, will greatly aid anyone in removing small Christmas type bulbs.

NEW

3. While the preferred shape is a "U" shape, it may also be in circular, oblong. or rectangular shape with or without the 90 degree bend.
